

The Best Wheat and Mixed Farming Lands in Alberta

VOL. III NO. 36

CHINOOK, ALBERTA, OCT. 19, 1916

Subscription: \$1.00 per year, in advance. Single Copy, 5 cents

Patriotic Rally in Chinook

Breezelets

Rumania continues obstinately refusing to accept Berlin reports of annihilation at their Berlin face value.

After seeing what has happened to most of the innocent bystanders, Greece feels that its safer to be on the inside, looking out.

It's a case of look out, anyway, whether she is on the outside, or not.

"Why should we be compelled to pay \$5.00 for flour? a farmer was overheard to say the other day.

Well, perhaps one reason may be that the merchant doesn't want to let us have it without pay.

Uncle Sam's expedition in pursuit of Villa cost \$100,000,000.

That man is dreadfully expensive—and he's still at liberty.

"Allies recognized the new provisional Greek government," says a news heading.

Greece has gotten something that can be recognized at last—King Constantine's grease spot.

"Fisheries are a valuable asset to Canada. Total revenue for the last fiscal year was somewhere in the neighborhood of \$36,000,000," says a news item this week.

Ba-jove! Who's have ever think our fisheries were as valuable as that after a couple of days' fishing in Sounding Creek.

A new note of a critical nature has been handed to the Greek government by the Allies.

Betcher it wasn't one of the pre-election Wilson kind, either.

"Friction grows between Huns and the Turks," says a dispatch.

Its the Allies' artillery that is causing the friction.

The British admiralty has returned to America 100 dozen sets of false teeth consigned to Germany.

This may be cruel and unusual but it seems to be a legitimate feature of the hunger blockade.

The 175th Batt. Safe

IN ENGLAND

It is officially announced that the following troops have arrived safely in England:

The 175th and 151st Alberta battalions

The 152nd, Saskatchewan batt. 179th Highlanders, Winnipeg 193rd Winnipeg battalion

The official announcement of the safe arrival of the 175th batt. in England will put to rest any fears as to the safety of the vessel carrying these troops across the ocean being caught by any of the U-boats. It is quite possible that the 175th will be at the front in the spring, perhaps before.

"Mother of Inventions"

TAKES A HAND IN THE GAME

"Necessity is the mother of inventions."

Among many other things war has produced a phenomenal shortage of paper, which threatens and really is in a very serious condition. But true to the old adage a substitute has been found for pulpwood, the principal component part in paper, which seems destined to revolutionize the paper making business.

Specialists are convinced that a satisfactory quality of book paper can be made from hemp hurds, the waste stalk fragments produced in preparing hemp fibre for market. A report of a test says that its has demonstrated that hurds can be reduced chemically to paper stock by the soda process under practices only slightly different from those employed for the manufacture of pulp from poplar wood. Somewhat more bleach, as well as beating, was necessary.

This joke was overheard in the hotel the other day:

"Waiter, this coffee is nothing but thick mud."

"Yes, sir; certainly sir. It was ground this morning."

The year 1916 has 53 Sundays which is rather out of the ordinary, and thus October has five Sundays and December five, with November sandwiched in with the usual four.

The man who has money to burn is pretty sure to meet his match.

Allies Contention Rejected

BY THE UNITED STATES GOVERNMENT

THE United States has refused to accept the contention of the entente allies urging that neutrals deny the use of their harbors to all submarines, whether merchantmen or warships.

The allied governments in a memorandum to neutrals called attention to the grave danger incurred by neutral submarines in the navigation of regions frequented by belligerent submarines.

The allies claim that submarines are outlaws as the note from London shows, brought up the question whether the United States government may be sued for damages because of the call of the German submarine at Newport before she started her raid against commerce.

Under the allies interpretation the position may be taken that Newport was made the base for operations which they estimate already have caused \$6,000,000 damage to shipping and trade. The American government holds that a warship has a right to enter a neutral harbor and that the U-53 in no way attempted to make Newport a base.

Apparently the United States government—by its own decision—does see any danger in the U-boats patrolling its shores, or the grave possibilities that might arise should America become involved in war with Germany. The American government's contention that this U-boat can call at its ports and get all the information regarding the cargoes and the owners of the outgoing and incoming vessels, and slide outside the three-mile limit, and then wait for their victims and blow them up at will, is a mighty dangerous one. If the American government's contention is right, then fifty or a hundred U-boats could have the same privilege.

What, then, becomes of the American trade, with all its ports bottled up by a patrol of its shores by these U-boats. How many outgoing and incoming vessels are going to take the risk of being blown up. American ports would be as effectively blockaded as much as she would have been had she been at war, and that, too, by a neutral nation.

Its a wise nation that takes a timely warning. This U-boat may come home to roost.

Chinook Breezes

Hurry up, Indian Summer.

The brick-work on the new school is now finished.

It doesn't matter where you are read the Advance advts.

Mr. R. S. Woodruff has added a steam fitter to his staff, Mr. W. Murray of Edmonton having accepted the position.

The subscriptions towards the Patriotic Fund in the Acadia constituency for September amounted to \$1,256.75.

Just One Thing and Another

The snow and frost of this week has again delayed threshing operations.

Arrives Safe in England

A cablegram has been received from Major Rideout telling of his safe arrival in England with the 175th batt.

Another Lays Down His Life

Pvt Hugh Loveday, a pioneer, of Oyen, has been wounded at the front. He was a butcher in the town for several years and took an active part in the public affairs of the place.

Mail Route Day Changed

The mail route going out from Chinook to Coliholme, Bigstone, Heathdale and Kimmunday has been changed from Monday and Thursday to Tuesday and Friday the change having been made this week.

For a Good Cause

The following articles were sent to the Red Cross central at Calgary last week, by the Chinook Women's Institute:

- 1 dozen surgeon's caps
- 2½ dozen pyjamas suits
- 1 dozen pair surgeon's sleeves
- 3 dozen T bandages
- ½ dozen many-tailored bandages
- 4 bed jackets

A Very Worthy Object

The preliminary arrangements for a branch of the Victorian Order of Nurses hospital for Chinook have made some progress during the past week. The application for affiliation and a charter will be before the board of managers at Ottawa this week. Two sites have been selected one of which will be finally decided upon. Collectors will soon be at work to get in funds. Quite a large sum will be needed for an en-bed hospital.

Rural Mail Delivery

OUT SOUTH FROM CHINOOK

Rural mail delivery has been a live question almost all through Alberta, wherever it has been feasible. Among other places Chinook has been agitating this question for some time, and more than one petition has been sent to the dominion government towards that desirable end, going out to outside points contiguous to Chinook. This agitation is beginning to bear fruit. A government representative recently went over the two following routes

- Chinook ½ mile to s.w. cor of sec. 4
- 1 mile west
- 10 " south
- 1 " east
- 2 " north
- 1 " east
- 6 " north
- 1 " west
- 2 " north
- ½ " to Chinook P.O.
- Route 2
- Chinook ½ mile to s.w. cor. of sec. 4
- 3 miles west
- 2 " south
- 2 " west
- 6 " south
- 2 " east
- 6 " north
- 1 " west
- 2 " north
- 2 " east
- ½ " to Chinook P.O.

It will be noticed from the following regulations that the government requires 50 per cent. of the total number of possible patrons purchase these mail boxes. These routes are 25 miles each. If boxes can be secured on an average of one a mile this will give a mail delivery three times a week; and if the boxes average two per mile it gives a daily mail.

"The regulations governing rural mail delivery require that a person desiring to avail himself of the system shall purchase from the post office department the necessary rural mail box, the price of which has been set at \$4.50, and, further, shall provide, at his own cost, the regulation post therefor, and erect the same according to the regulations, the department providing, free of cost to the patrons, but at the patron's risk, for the collection of mail matter out of, and the delivery of mail matter the rural mail boxes.

It is particularly requested that all those who wish to have a rural mail delivery box will send in their application without delay on a prescribed application form. Everyone should get in on this proposition.

Breezelets

"Germany wants to keep the way open to the east. She would be willing to quit the west if this were assured," is the latest Hun fool peace talk.

Guess the Huns will have to try again. Jolly lucky if they can keep the way open to Berlin to run home at the end of the game

German utterances are more bitter than ever against the British.

That's but natural, anyway. This bitterness is, no doubt, the result of the "British bitter pill" the Huns have had to swallow since the big drive.

A kind of Kaiser Bill-iousness, as it were, don'tcher know!

According to the latest dominion census, Calgary has a population of 56,000.

The balance had invested in outside lots—hence the landslide in a reduced population.

Men Wanted

FOR THE ARMY SERVICE CORPS

The Canadian Army Service Corps is now enlisting men of the following trades for service overseas: motor drivers, teamsters, bakers, butchers, farriers, saddlers and wheelers. The medical examination is not so strict as for other branches of the services. Railway fare will be refunded (if accepted) on production of a receipt from local ticket agent. Intending recruits may apply personally or by letter to the recruiting officer, C.A.S.C. (Overseas), 810 1st St. W., Calgary.

The date for the R.C. service in Chinook has been changed from Sunday, Oct. 29th, to Wednesday, Nov. 1st, at usual hour. This has been found necessary on account of Father Dagen leaving the parish. The Rev. Father Bowlen takes charge of the mission.

It is reported that print paper is to be made of "bagasse," which is said to be the material left after grinding sugar cane. Old newspapers may soon have a new value as a foodstuff if bagasse retains any of the original sweetness of the cane.

Don't Cough Your Throat Sore, Don't Suffer, USE "Nerviline," It Will Cure You Quickly

The Annoyance of a Bad Cough Soothed Away in One Day

Nothing so bad for the throat as coughing, and nothing half so annoying as to have someone near by that is hacking, sneezing, or constantly clearing the throat.

Rub on Nerviline—it will save you all further pain and distress. Even one good rub with this soothing, penetrating remedy will bring the finest relief, will take out that rasping soreness, will stop that irritating tickle that makes you want to cough so much.

Nerviline isn't something new. It has a record of forty years of wonderful success behind it.

In rubbing on Nerviline, you use something safe, reliable and sure to cure your active cough. The way it penetrates to the seat of the congestion is really a wonder.

For chronic colds, coughs, sore throat you can't beat this trusty old family remedy. Its name spells cure for any sort of pain in the joints or muscles. Try it for rheumatism, rub it on for sciatica or lumbago, test it out for neuralgia or headache—in every case you'll find amazing virtue and curative power in Nerviline.

Most families keep the large 50c bottle, always handy on the shelf, trial size 25c, at all dealers in medicine, or the Catarthozone Co., Kingston, Canada.

The Birth of a Nation

A Thrilling Drama Shown in Motion Pictures

The unqualified success attending the production of D. W. Griffith's famous "Birth of a Nation" last season decided C. F. Walker, of Winnipeg, to again secure the rights to this western tale, and the mightiest spectacle, the eighth wonder of the world, will make its reappearance at the Walker, Winnipeg, for three days with daily matinees, commencing Thursday, September 28.

This will be the third visit (the picture having already been presented four weeks in Winnipeg), and there is little doubt capable of drawing again to the theatre. After playing the Manitoba capital, the company goes to the Orpheum Theatre, Brandon, for the entire week commencing Monday, October 2nd, where two performances daily will be offered. Regina is the next city to be played, where two shows daily, commencing Thanksgiving Day, Monday, October 9, will be presented.

For three days, commencing Thursday, October 19th, the Empire Theatre, Saskatoon, will be played, and from there the organization travels West towards Vancouver.

Arrangements are being made to run special trains from the small towns and villages of Winnipeg, Brandon, Regina and Saskatoon, and there is little doubt that many will avail themselves of this opportunity. The world has never seen or is likely to see for many a day.

"The Birth of a Nation" as presented in the above towns will be precisely the same as the one now playing the Massey Hall, Toronto, and the fifth week-end comprises not only 12,000 feet of film, but carries a sixty-foot car of scenic, sound and lighting effects, and last, but by no means least, must be mentioned, the excellent symphony orchestra of no less than twenty-five carefully selected musicians.

Minard's Liniment Cures Burns, Etc.

A Family Talk

"See here, Jones, you've had that telephone receiver at your ear for ten minutes and haven't uttered a word."

"S-sh! I'm having a typical conversation with my wife."

To safeguard the child from damage that worms cause, use Miller's Worm Powders, the medicine par excellence for children. These powders will clear the system entirely of worms, will regulate and stimulate the organs injuriously affected by the worms, and will encourage the healthy operation of the digestive processes. As a vermifuge it cannot be surpassed in effectiveness.

United States is now exporting \$75,000,000 worth of sugar yearly. Before the war the yearly export was valued at about \$5,000,000.

500,000 Germans Disabled at Verdun. Competent authorities estimate that about 500,000 Germans have been disabled in the Verdun region alone since February the first of the year, the great German offensive there.

The total number of wounded German prisoners taken in the Verdun sector and in the neighborhood of the Somme exceeds 43,000.

Job-seeker (entering office unannounced): Is there an opening here for me?

Chief Clerk: Yes, sir, right behind you.

Bovril makes other food nourish you

Bovril makes other foods nourish you. It has a Body-building power proved equal to from 10 to 20 times the amount of Bovril taken.

Women As Inventors

Many Notable Inventions Are the Result of Ingenuity of Women

Women are generally considered lacking in inventive ability. The truth is that they have been taking out patents steadily since 1790. It must be confessed that these ideas have not always turned out a complete success, but, then, the world has progressed as a result of many mistakes other than those of inventors. How few women ever realize as they ply their crocheted needle that it was a Scotch woman, Christian Shaw, the daughter of the third Earl of Balgarnie, in Renfrewshire, who was the first to produce linen thread, as far back as 1729; her idea was developed later by the big textile firms of Clark and Coats.

Silk weaving was invented by the wife of the fourth Emperor of China in the dim ages of antiquity; a woman in the harem of an Indian prince invented the weaving of cashmere shawls; the same clever woman or her mother (authorities differ on the point) discovered attar of roses; while a poor Italian woman rediscovered the secret of Venetian paint, which had been lost for nearly 600 years. Madame Curie's triumph as the discoverer of radium is still fresh in the public mind, as is that of Dr. Maria Montessori, whose novel methods of education have won the art of teaching in the near future.

Two Kinds of Water From One Well

Ordinary Water and Brine Are Pumped From One Well in Florida

The geologists of the United States Geological Survey have lately discovered a well in the State of Florida, which contains two kinds of water. It is 309 feet deep. It was first drilled to a depth of 100 feet, from which depth ordinary sulphur water was obtained. The drill was then carried to a depth of 309 feet, where it opened a vein of water that has a strongly disagreeable, salty taste. In order to use both kinds of water, an arrangement was run nearly to the bottom of the well. Both that and the outer casing have been connected with pumps, so that ordinary water and mineral water can be pumped at the same time. A favorite joke played on visitors to the well was, first a drink of the weaker water, and then, if they ask for more, a glass of the brine. In an investigation of the underground waters of the country, the staff of the Geological Survey have found more than half a dozen wells of that kind, but there is no reason why they should not be common in regions where the waters in the upper strata differ from those that lie deeper.

He was taken to task because he had not made an effort to enlist in the British army, and in his own defense said: "I'm not asking to be let off—I'm asking for more time. I've got a lot of concrete to finish."

"How long will they take?" asked the Sergeant. "Oh, about three years."

The Test
Mrs. Gnagg (with a reputation): Doctor, I fear my husband's mind is affected. Is there any sure test?
Doctor: Tell him that you're a nurse and speak to him again. If he laughs, he's sane.

A PROMINENT NURSE SPEAKS.

Many Nurses in Canada and Elsewhere Say the Same.

Chatham, Ont.—"Being a nurse I have had occasion to use Dr. Pierce's Favorite Prescription quite a lot. I always recommend it to my patients and it has been a wonderful help to many of them. I never knew of a case where it failed."

I have a patient who is using it now and she is doing splendidly well. I have taken it myself and got the very best results. I consider it the best medicine there is today for women who are ailing."

—Mrs. E. M. Moore, 30 Degge St., Chatham, Ont.

THAT WEAK BACK

Accompanied by pain here and there—extreme nervousness—sleeplessness—maybe faint spells, chills or spasms—all are signs of distress for a woman. She may be growing from girlhood into womanhood—passing from womanhood to motherhood—later suffering during middle life, which leaves so many wrecks of women. At any or all of these periods a woman's life she should take a tonic and nerve prescriber for just such cases by a physician of vast experience in the diseases of women.

Dr. Pierce's Favorite Prescription has successfully treated more cases in the past few years than any other known remedy. It can now be had in sugar-coated tablet form as well as in the liquid. Sold by medicine dealers or by mail for \$1.00 per bottle. 60 cents in stamps. Dr. Pierce's Invalid Hotel, Buffalo, N. Y. Dr. Pierce's Pleasant Pellets clear the complexion.

The Revolt of Brussels

Germans Trying to Drive Belgians to Last Stage of Desperation

Report that the city of Brussels has refused to pay a fine of five million marks, imposed as a penalty for the patriotic demonstrations which marked the observance of Belgium's national day, July 21, is but only one of the many news of staggering interest in the whole world.

Brussels is under the German heel what can she do?

To attempt to squeeze more millions out of the people of the Belgium capital, because of the inevitable show of patriotism on such an occasion, would be outrageous. But, even at that, the explanation is probably only trumped-up.

The German military authorities have heretofore given plain evidence of a desire and purpose to drive the Belgians to the last stage of desperation. The revolt of the municipality of Brussels at this latest moment indicates that the stage has been reached.

But if the people of Brussels nevertheless can not stand any more oppression, what next?

The Germans undoubtedly have that all arranged, and we must not be deceived by the fact that it is a sinister one. They would hardly have penalized the city without preparation against the emergency.

More than probably, they expected a refusal, as well as planned for it. They have already by the enormity of this latest punitive act, to arouse the city to revolt.

They have done all in for a series of fresh spectacles illustrating the German capacity for contriving ingenious brutalities, for following up a cowardly attack on human rights by another one, indefinitely, for pillaging horror after horror?

They have ravaged the Belgian harvests for their own use. They have driven off the herds for meat and milk—and cased, for their mutilations, the bodies of the poor men, women and children to slave for the German state. They have robbed the Belgians of their property. They have taken millions of marks from the Belgians to supply their own embellished sieves of war.

They have done all this in defiance of the law of nations, of Hague conventions and of the opinion of the civilized world. They have shown in repudiation of their own pledges.

The Germans in Belgium are not done yet. They are made in the double-edged sword.

The first chapter of the atrocities which the Belgians must suffer is yet to be written.

The world will witness with fresh apprehensions of barbarous cruelties in store for that hapless people, the German plan of reprisal for the Brussels revolt.—*Providence Journal*

A Scriptural Wheeze

"How are you getting along?"

"But the women. Aren't they a bit attentive?"

"Yes, but I find safety in numbers."

"Egad, brother, I found safety in numbers."—*Chicago Tribune*

High Cost of Living

The Staff of Life and Its Upward Tendency These Days

The high price of wheat conveys an ominous significance to the housewife. A grocer predicted a few days ago that before spring brands of \$6.50 costing \$6.50 a barrel formerly will go to \$9.00 or more. This will be less than the record price of about \$10.00 for three grades last year. But the advance will come closer home to working people than any other present result of war.

In spite of present prosperity there are still large sections of our population for whom bread is the main article of subsistence. To great numbers of recent immigrants meat is almost a prohibited luxury. They may pick up some remnants and bones cheap, but only for use as an appetizer. Bread and soup are the menu. A touch of onions or other pungent vegetable may be used to give the meal some twang.

A well-seasoned soup has a surprising effect to give an otherwise dry provender some flavor and make a meal seem more substantial than it really is. With this added relish many newcomers to this country will grow along for days on their loaves baked after the foreign manner.

Wheat bread, of course, is food of the most substantial character. People of indoor life and finicky appetites would not eat enough of it for full nourishment. The manual laborer, hungry from his fatiguing task, puts it down with avidity. If he came from a country where he may have learned to eat it without butter, the present high value prices will again encourage the farmer to stuff grain, and borrow money to pay his help. But the wastes of trench life are great.

It is a serious matter for wheat grain, and borrow money to pay his help. But the wastes of trench life are great. It is a serious matter for wheat grain, and borrow money to pay his help. But the wastes of trench life are great.

To Continue Exploration

Stefansson Plans to Discover Extent of the New Northwest

A letter has been received by G. J. Desbarats, deputy minister of naval service, from Dr. Anderson, of the Stefansson northern exploration party, who some time reached Nome. The letter gives additional details of the work done by the party and supplies some information as to Stefansson's future movements.

The letter states that Stefansson's plan had been to make a northerly circuit around the new land which he discovered a year ago, with the object of discovering its extent and whether any territory existed north of there.

As a result of the fact that his ships did not succeed in getting far north in 1915, however, and of trouble with his dogs, the explorer was unable to carry out his design. He had reached his new land last May, but it is understood that he will winter at Winter Harbor, on Melville Island. The schooner, Polar Bear, one of the vessels of the expedition, was expected to reach this port this summer and form a winter base there.

Kent Chipman, one of the members of the southern party who travelled to Edmonton by the overland route, instead of going to Nome with the rest of his companions, has reached Ottawa and is preparing his report to the Geological Survey Department.

Chipman, who was topographer with the expedition, travelled south by way of the Mackenzie and Athabasca rivers.

Advice to Clergymen

"Why don't clergymen who are unequal to composing good sermons for themselves (and the nature of things there must be a good many of them) occasionally read one of the beautiful homilies provided for them by the church? Or why don't they frankly read someone else's sermon, giving credit to the author, instead of scribbling passages and spilling them in the conveyance? One wonders whether the hack sermon-writer exists, and the man who, in the eighteenth century and later, 'loaned' original sermons in manuscript for a trifling fee. It is on record that Coleridge, when he was particularly hard up, raised the wind in this way. How much would a sermon in Coleridge's handwriting fetch at Solihby's today?—*London Chronicle*

Taxation Of Land Values

The day has long since passed when the doctrines of Henry George could be ridiculed or scouted as unworthy of serious attention. They have found much acceptance in Europe, and particularly in Great Britain, where there is now a widespread feeling in favor of the taxation of "unearned increment"—a feeling which crystallized into legislation some years ago when Mr. Lloyd George was Chancellor of the Exchequer. In Australia, in the Canadian West, and elsewhere, the principle of differentiation between taxation of land values and taxation of improvements is continually gaining ground.

"Progress and Poverty" blazed the way for what has now become a large and important school of thought in legitimate political economy.—*Hampden Spectator*

"Who is your favorite composer?"

"Wagner," replied Mr. Cumroo.

"You must be a student of music!"

"No, I mention Wagner for the sake of relieving myself of conversational strain. If the other man doesn't like Wagner, he won't want to hear me say another word."

"And if he does?"

"He'll want to do all the talking himself."—*Washington Star*

"Don't you think Miss Howler has wonderful control of her voice?"

"No, I don't. She sings every time anyone asks her to."—*Boston Transcript*

TRAINING AND A GOOD PARTNER WILL MAKE STRONG COMBINATION

WIFE HELPS THE SOLDIER-FARMER TO SUCCEED

The Government Is Making a Special Monetary Allowance in Addition to the Pension, for the Maintenance of Both the Soldier and his Family. While he is Receiving Elementary Training

"What makes you think you will succeed as a farmer?"

The question was asked of a returned soldier who had expressed a very strong desire to get on the land.

"My wife," he answered.

"Do you mean to say she persuaded you?"

"No, I didn't need any persuading. But she wants to go as much as I do."

"Does she understand what it means?"

"She ought. She was born and brought up on a farm; she is not afraid of hard work, and she prefers to live in the country anyway."

"For the children's sake?"

"We've got none, but luck, No, she likes it better herself."

That man's better is half won. He was not a farmer by himself, and he does not imagine the little experience he possesses is enough. He is therefore taking advantage of the elementary training in such matters as gardening and poultry raising, already started by the Military Hospital, and at some of its Conveyance Hospital, and he aims at taking a course of extra instruction later on at one of the agricultural schools.

As announced some time ago, the Government makes special monetary allowances, in addition to the pension, for the maintenance of both the soldier and his family while he is being trained, if he has to learn a new occupation, to no man should have the slightest hesitation about taking full advantage of the training put at his disposal, to increase his capacity and better his position.

A trained man, and a wife both experienced and willing, make a team hard to beat.

It is very interesting to see that this fact has been recognized in a most practical way in England. There the Government decided, a few months ago, to start, by way of experiment, three pioneer colonies of ex-soldiers, rather than colonies of ex-soldiers, for even the man now ploughing the sea will have his chance of ploughing the land.

The President of the Board of Agriculture has just announced that in selecting soldiers for these colonies, "preference will be given, as between men of equal merit and qualifications, to those whose wives or sisters, or daughters, have acquired proficiency in milking or other farm operations, as the result of their employment on the land either before or during the war."

As a matter of fact, women in the Old Country have been a large and even extraordinary strength to the farms, which the war has deprived of so many of their usual laborers. Women of every social rank have volunteered to do this, and have kept their pledge, though many of them were not well adapted to manual labor, but free from any necessity to work at all.

Canadian women, the vast majority of them, have never been in this position. Work has always been familiar to them, and a very large number even of the older women, among them were brought up on farms. Many of our returned soldiers, therefore, who think of going back to the land, will have a great advantage in the experience of their wives as well as in the special training offered them.

Special training is given, of course, for a variety of other industries. The greatest care is taken to give the occupation best suited to each man's ability. But, unquestionably, agriculture is the great national industry, and needs the energy of every man qualified to undertake it.

To Advertise Butter

The National Dairy Council, according to reports sent up by the secretary, is planning to follow the example of the orange and raisin growers, and put on an advertising campaign to cover three years, spending at the rate of \$20,000 a month. This money will be used in advertising the value and the healthfulness of milk, buttermilk, cheese and ice cream. The advertisements will be carried in the leading magazines and daily papers. It is an ambitious programme, but not at all impracticable if the dairy interests are willing to pay the bills. If the advertising is well done, it will be profitable to the dairymen of the country, and will increase the consumption of dairy products permanently; and if the supply can be increased to meet the demand without too much of an advance in price, the results will be satisfactory.—Wallace's Farmer.

Captain Koening's "Sacrifices"

If Captain Koening, of the Deutschland, had remained in Baltimore he might have made a nice little life. He was offered, for example, \$3,000 a night by a show if he would appear on the stage on his 80th birthday. \$50,000 by a journalist for liberty to accompany him in his voyage across the Atlantic. He was offered \$50,000 to land overboard and sink.

He was invited to marry a lady who would have given him a handsome reward for his name. All of which Captain Koening declined. But it is reported that when peace is proclaimed he will return to the United States. He sees more money there.

High: There's Fred Seaver there. He made a million in the Street last year.

Lower: Honestly?

High: I don't know, but he made it.

How Britain Cares For Her Soldiers

Former French Minister Lourd in Praise of British System

Adolphe Brisson, formerly a French minister, has returned to Paris from a visit to the British Isles. He gives a very interesting and interesting description of how a great army is administered in the field, and of the special combination in the manner in which the British soldier is cared for.

"We mean generals who are not only great administrators, trained in India, Egypt, Africa, accustomed to the most difficult conditions of the East. They spare neither expense nor trouble in establishing the base of a long, they make every effort to make it better."

"I admired their calm confidence in the sovereign power of Great Britain. Always they made the same statement."

"We English need time to understand. We did not know war like the French. It was not a game, it was a slow in starting, but we are there now, and nothing can stop us."

"The men, however, are due to the sanitary service. On principle the English soldiers do not want barracks. The fighter must live and breathe better; cleanliness is easier to keep, vermin are easier to destroy; every morning everything is burned."

"On their arrival the men receive thorough and vigorous disinfection. They are bathed and scrubbed, clothing boiled, their coats are then the soldier is dressed neatly in a white shirt with soft collar, red tie, and white with red and olive trousers."

"He is then taken to a paradise, a garden in which are scattered the green tents, dining tents for the officers, and the tents for the soldiers. He finds them clean and comfortable, and benches to rest upon. For the soldier, everything is arranged, even a chiropractor! And the men's attention, the cheer!"

"The men are said to be equal to seeing my amazement, that on returning to the trenches our soldiers may be able to say to his comrades: 'I've been in the front, but I'm not much better off in the hospital!'"

"He is noted here, too, that nurses are given the most complete facilities and hospitals are in comfortable quarters, well fed and paid. They work, they must be cared for, is the slogan."

"It is a fact that the Englishman does his best when he is well looked after. Give him his roast beef and he will fight well."

Grain Screenings

Cleaning Grain at Threshing Time a Good Practice

In a bulletin entitled "Grain Screenings" issued by the Dominion Department of Agriculture, it is estimated that the grain screenings in shipping western grain uncleaned amount to considerably more than half a million dollars. The following are the reasons for this: The grain screenings should be of value in connection with the problem of eliminating the weed seeds from the grain, and grain subject to a dockage on account of screenings.

A more efficient and a five horsepower engine were purchased and both mounted on an extra strong wagon. A 15-foot ordinary grain elevator was attached to the rear of the wagon. Another box received the screenings (mostly broken and shrunken grain). The cost of the engine and the operation, including the operation, repairs and interest on capital was \$195. The grain screenings were sold at \$1.00 per bushel, and the screenings of broken and shrunken wheat worth \$0.60, freight on the screenings cost \$0.20, and haulage to the local elevator \$0.40. He thus had a profit of \$1.00. The surplus paid for itself in one year, and he says as good as when it started. This experiment, it is argued, proves that cleaning the grain on a large farm before hauling is practicable and advisable. The really practicable way for the whole country is to have a large farm with a threshing outfit should include a grain cleaning attachment, as many of them now do on a sheep raising machine.

Any ordinary threshing machine fitted with proper screens and carefully operated is capable of removing many of the smaller weed seeds that now constitute a considerable percentage of elevator screenings.

"I wasn't always like this, lady," said the wayfarer at the back door. "There was a time when I had every thing money can buy."

"You poor man! How did you come to this?"

"I'll tell you, lady. My wife used to keep me on the go all the time. One week it would be to the beach, the next it would be Palm Beach or the Adriatic or else Europe, according to where the society folks were."

"You poor man! How did you come to this?"

"I'll tell you, lady. My wife used to keep me on the go all the time. One week it would be to the beach, the next it would be Palm Beach or the Adriatic or else Europe, according to where the society folks were."

Bukovina Duchy a Place But Little Known

Sandwiched in Between Galicia and the Northwestern Frontier

When the present writer first visited Rumania a young American, whose high-pitched accent lives in the memory, greeted him on board a Danubian steamer, with the question, "Have you ever heard of a place called the Bukovina?" writes a special correspondent of the London Times.

As it happened, he had, and this piece of knowledge much impressed the American traveller, who assured him that in the States nobody had heard of it at all. The traveller, however, had been studying European politics and selecting his routes in a far-sighted manner with a view to becoming an authority not upon past but upon future history. Someone in Paris had told him about the Bukovina. He was now on his way to it, and he formulated his reasons in words of this kind: "Some day, Emperor Francis Joseph is going to die, and the Austrian Empire is going to break up. The I. go down, and going to be trouble in the Bukovina, for they tell me that the people who live in it are Rumanians. So there must be a regular war and it is pretty sure to try to get it for herself. When that day comes, it will be very interesting to say I have been there, so I am going up to have a look at it now."

Perhaps he was right in attributing importance to this mysterious district, in his own countrymen, and possibly also the knowledge of its whereabouts was not more generally diffused amongst ourselves. The child who, when told the other day that it was a great thing to be a Rumanian, retorted that it seemed to her that it was geography we were making, and that she did not see the point of learning any more about the war was over and things were a bit settled; had a strong case.

But the matter of geography is in the melting-pot, most of us have been learning a good deal of it since the war began, and many must have learned their first introduction to the Bukovina. It is a Duchy and Crown land of Austria and is sandwiched in between the Province of Galicia and the northwestern frontier of Rumania. Bukovina means the country of the Buk, a river which has a portion of it in forest clad, for it lies amongst the southern slopes of the woody Carpathians. Its area is about 20,000 square miles, and the population of the Duchy is some three-quarters of a million. Of these about 40 per cent. are Rumanians, and nearly another 40 per cent. are Ukrainians, the balance being made up of the various Balko-Hungarian races, including the Magyars, Poles, Jews and Gypsies. The Rumanians and the Ukrainians belong to the Orthodox Church, and the vast majority of the inhabitants hold with Rumania and with Russia in the matter of religion.

The Rumanian peoples in the Bukovina and in Transylvania are not as might be supposed, settlers who have moved across the frontier. They have their roots deep in history. Rumania herself is a geographical anomaly and is very curious to find a Latin enclave in Eastern Europe surrounded on all sides by Slavs and Magyars. It is not only the Rumanians speak a Latin tongue closely resembling Italian, but in spite of all admixture with Slavs and Magyars, they retain to this day strong signs of their Italian blood. Rumania is the descendant of Trajan, the Roman Emperor, and the explanation of the Rumanians in the Bukovina and Transylvania lies in the fact that Trajan's province included both these districts and was much larger in extent than the modern country of Rumania. But as the centuries passed, the Rumanians set up a more modern claim to the Bukovina, and the kingdom of Rumania was created in the nineteenth century from the union of the two provinces of Moldavia and Wallachia, which were formerly Turkish. The province was once a part of Moldavia and in 1859, Suceava in the Bukovina was once a Moldavian capital, and when Catherine II. declared war upon Turkey the Russians occupied the Bukovina in 1769, but when peace was made in 1774, Austria had been much preoccupied with this occupation and made no claim of her anxiety for the situation to Turkey. But this friendliness was by no means disinterested, for she promptly set up an intricate system to secure it for herself, and in 1777 the Porte redeemed it to her. Since then it has remained in Austrian hands.

Transylvania has been held under the Hungarian heel for nearly a thousand years. Once for a few brief years, Michael the Brave, King of Wallachia, added it to his territory. Michael, however, did not intend to keep it by a wholesale bribery and corruption of the Turks, which involved him in apparently hopeless financial embarrassment. But he was not called brave for nothing. He summoned a creditors' meeting in his palace at Cluj, and then having done he burnt it to the ground, making a clean sweep of Turkey's accounts books, and all. Thereafter he fled to Hungary.

Transylvania, but when the peasantry revolted against their Hungarian lords, they were foolishly and unaided with the latter. Thus he lost the sympathy of his new subjects who were his only hope of success. Michael was assassinated in 1601 after a brief reign of eight years. Upon his death his son, Michael II., was crowned, for Rumania regards him as the creator of her national unity and perhaps her greatest national hero.

Smart

Kindly Gent: Aren't you afraid of catching cold on a night like this?

Boys: No, sir, I'm all right.

Selling papers: Keep up the circulation.

Financier: And will Bobby be sorry to see his sister?

Bobby: Yes, I will, 'cause I like you.—Boston Transcript.

Small Grain Exhibits

The Influence for Better Crops Resulting from Fair Activities

"The use of better seed offers one of the most effective methods for increasing the yield of farm crops. The success of seed improvement associations and individuals who carefully select their own seed, has resulted in the general use of better seed. Competition in producing and displaying crop products of high quality at agricultural fairs is another influence which should have an increasing benefit on the quality of seed planted. The influence for better crops resulting from fair activities should be greater if more persons exhibited their products and if greater care would be taken in the selection and preparation of exhibits. A creditable exhibit of field crops should contain products which are typical of the district they represent. The crops comprising an exhibit should be harvested when in prime condition and should be of superior quality and worth. They also should be properly and tastefully arranged when placed on exhibit."

See grain, wheat, oats and barley. Grain prepared for exhibit should be harvested when in prime condition and should be of superior quality and worth. They also should be properly and tastefully arranged when placed on exhibit."

Domestic Gas From Straw

Simple Plant to Use Up the Straw Pile and Supply Fuel and Light

The day of applying a match to the straw stack after threshing is over, which thereby burns up a whole year's fuel is now passed, and from now on the farmer is likely to pay as much attention to the safeguarding of his straw as he does to his cattle and crops. From the straw stack, which has hitherto gone up in smoke, gas can now be extracted and used as fuel for the farmer's domestic needs. A simple process that every farmer can cook, heat his house, light his residence, and run his engines from his own little gas plant right at his very back door, using the much-despised straw pile as a means of fuel.

The Dominion By-Product and Research Society, of Moose Jaw, which is a branch of the Saskatchewan Bridge and Iron Works, is the leading spirit, has discovered and perfected a small gas works which will in the near future be manufactured in the city and installed on practically every quarter section throughout the country.

Mr. Harrison, the patentee, has obtained patent rights in Canada, the United States, Russia and the Argentine Republic. In an interview recently he said that no farmer will be far from his own gas plant in the near future.

The exceedingly simple way in which the gas is produced guarantees the truth of this statement. One bale of straw, wheat, oats or barley, is put into a cast-iron retort, the retort is heated by a small portion of straw is ignited in the firebox underneath. This produces the gas, which in turn passes out of the retort through another small cylinder of water in which it is washed and from there finds its way into a gasometer. The gasometer is a tank of straw will produce enough high grade gas to do all the cooking, heating, and lighting of a seven-roomed house, and it is a safe conclusion that from now on, instead of burning his straw stack as he has hitherto done, the farmer will, through the efforts of the Research Society, conserve his straw and make it pay for itself.

Mr. Harrison and his associates have had Dr. Andrews, of the well-known firm of Andrews and Cruickshanks, analytical chemists, employed to analyze the gas for all the problems in connection with the small gas works and gases extracted from the straw. The gas is scientifically worked out by them in their laboratory at Government Building, Regina, and for some time has been in miniature gas works, where it has been burning and most satisfactory results have been obtained.

According to the report of Dr. Andrews, the gas from straw has produced sufficient gas to enable a 40-candle power mantle to burn six hours without flame and highly illuminating flame.

The gases extracted from the straw are not only useful for cooking, but can also be utilized for driving engines and all other farm machinery. The gas is so clean and bright and light this welcome discovery should be of vast interest to every farmer throughout the Dominion of Canada.—Moose Jaw Times.

Salt For Live Stock

Feeding Too Freely Is Injurious to Animals

Samples of salt are occasionally sent to experimental stations by farmers, and the results of the tests on animals, usually cattle or sheep, are posted after eating it in considerable quantities. In no case has any harmful substance that would account for the poisoning been found.

Since salt is necessary to life and is in universal use, it is difficult to realize that in large amounts it is poisonous. In cases of poisoning in chickens have been reported, and occasionally in larger animals. In one instance salt was by mistake used instead of sugar in making a cake. The cake was given to the chickens and killed all of them. Chickens are very susceptible to salt poisoning and the amount that it takes to kill a horse or cow is considerable, this sometimes occurs when these animals are especially susceptible.

When animals have not had access to salt for a long time, it is safer to give it to them sparingly at first.

Home-made Barometer

A barometer that will indicate weather changes with reasonable accuracy may be made of two bottles. A milk bottle, nearly filled with water, is used as the container and a smaller bottle fitting snugly into the neck of the first is inverted in the milk bottle. The milk bottle should extend about an inch below the surface of the water.

When the water level in the inverted bottle shows a tendency to rise and fall in the neck of the inverted bottle.

"Am I good enough for you?" signed the fond lover.

"No," said the cynic, "you are, too good for any other girl.—New York Times.

British Soldiers as Farm Hands

In Cheshire, England, over one hundred British soldiers are engaged as farm hands gathering in the harvest. On one large estate over fifty soldiers are employed. It was reported that, as a sequel to the discipline and vigor of training, the men swung to work with a vigor and energy that usually takes six days. A feature of their service to the country was that at short intervals they keep up certain drill and study of instructions in tactics—that is, that they are more than twelve men at work within a given area.

SYNOPSIS OF CANADIAN NORTH- WEST LAND REGULATIONS

THE sole head of a family, or any male over 18
years old, may homestead a quarter section
of available Dominion land in Manitoba,
Saskatchewan or Alberta. Applicant must appear
in person at the Dominion Lands Agency or
Sub-Agency for the District. Entry by proxy may
be made at any Dominion Land Agency (not
Sub-Agency), on certain conditions.

Duties—Six months' residence upon and cultivation
of the land in each of three years. A homestead
may live within nine miles of his homestead
on a farm of at least 80 acres, on certain conditions.
A habitable house is required, except where residence
is performed in the vicinity.

In certain districts a homestead in good standing
may pre-empt a quarter-section alongside his homestead.
Price \$300 per acre.

Duties—Six months' residence in each of six years
after earning homestead patent; also 50 acres extra
cultivation. Pre-emption patent may be obtained as
soon as homestead patent, on certain conditions.

A settler who has exhausted his homestead
right may take a purchased homestead in certain
districts. Price \$300 per acre. Duties—Must reside
six months in each of three years, cultivate 50 acres
and erect a house worth \$200.00.

The area of cultivation is subject to reduction in
case of rough, scrubby or stony land. Live stock
may be substituted for cultivation under certain
conditions.

Some Don'ts for Farmers

A Few Suggestions on Domestic Economy for the Husband to Consider

Don't try to please your wife. Don't appreciate one thing she does.

Don't help care for the children—that is what you got her for. Don't ever plan your work so as to be able to take her to any entertainment.

Don't be ashamed to read that the majority of insane women are farmers' wives.

Don't get a bucket of water from the cistern when asked. Anyone can pump water half tries.

Don't fail to invite company for Sunday dinner without letting her know so she can have a day for rest.

Don't fail to ask your wife if she wants you to do all the housework if she asks you to put some wood in the stove.

Don't wonder that your food has a peculiar flavor, for it is seasoned with blasted hopes and sighs of disappointment.

Don't neglect asking what she has done with all the eggs and butter money, for it will more than supply the table, help pay the hired man and get the children books and clothes.

THE NATION'S FUTURE Depends Upon Healthy Babies

Properly reared children grow up to be strong, healthy citizens

Many diseases to which children are susceptible, first indicate their presence in the bowels. The careful mother should watch her child's bowel movements and use

Milk As A Stimulant

French Soldiers in the Trenches Are Given Milk Only as a Stimulant

One of the most recent discoveries of the Pasteur Institute of Paris has been to do with stimulating qualities of milk. While milk has always been considered an excellent tonic and known to be exceptionally rich in food value, it was not until the Pasteur Institute conducted a number of consecutive experiments that the stimulus of milk became a known quantity. For a number of months, milk has been given the French soldiers in the trenches and to many of them it has been the one and only stimulant. The effect which the milk has produced has more than justified the claims which the Institute made for it.

It is claimed that the stimulating effect of milk is especially notable when given to soldiers just before a big battle or a dangerous charge, and also when administered to the troops when in great fatigue. The advantage of the milk stimulus over the alcohol stimulus so extensively advocated in previous years is that there is no bad after effects, and the keenness of the senses is in no wise impaired nor the coolness of judgment affected.

The knowledge that milk is a stimulant of the most potent kind to those who have hitherto considered it synonymous with all things mild and peaceful, is a somewhat difficult to believe that the chief product of the patient and gentle cow should contain such an amount of food and stimulation. But, as proof of the contention we have the word of the world's greatest research institutions backed up by conclusive experiments in a place where stimulation of the most efficient sort is needed.

Business Men as Farmers

With Equal Advantage the Farmer Beats the Business Man Every Time

You often hear it said that farmers are not good business men! Many a city man spends a short vacation in the country and comes back to lay down the law about "business efficiency." According to him all these farmers need is a business system—all the rest would follow that. But what about the business men who have tried farming? Thousands of them have bought land and started farming with abundant capital, scientific advice and the finest of business training. How many of them make their farms pay even with their thorough knowledge of business? If they were forced to run a farm with the capital and equipment within the reach of the average farmer they would go bankrupt in less than a year. Their business training is based on capital and credit always within reach, and as they well know even with this advantage they fail to make a farm pay a profit nine times in ten. With equal advantage and equipment the farmer would beat them every time.

There is more Catarrh in this section of the country than all other diseases put together, and for years it was supposed to be incurable. Doctored, proctored, and by constantly failing to cure with local remedies, it has become a constitutional complaint. It is a local disease, greatly influenced by constitutional conditions and therefore a constitutional complaint. Hall's Catarrh Cure is a constitutional remedy, it acts internally, cleanses the blood in the mucous surfaces of the system. One case that Hall's Catarrh Cure fails to cure send for circulars and testimonials.

J. J. CHENEY, R. O., Toledo, Ohio.
Sold by Druggists, 75c.

"I've tried to teach my boy the value of money and distressing as 'Good thing'!"
"Well, I don't know. He used to have for ten cents but now he wants a quarter."

Oil for Toothache.—There is no pain so acute and distressing as toothache. When you have so unwelcome a visitor apply Dr. Thomas' Electric Oil according to directions and you will find immediate relief. It touches the nerve with soothing effect and the pain departs at once. That it will ease toothache is another quality of this Oil, showing the many uses it has.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Soothes the fretting child during the trying period of its development and thus gives rest and relief to both child and mother.

The Problem of the Useless Car

The problem in the automobile world today is what to do with the used car that has really outlived its usefulness but seems too good to scrap. Manufacturers have been writing to dealers asking for suggestions. The man who can find a real mission for the used car will solve one of the big problems of the day and incidentally will win some fame and a lot of fortune.

The average life of an automobile is from four to five years. It seems almost a miracle that a complicated machine of this age on the junk pile. It may be said that no solution has been found for the old piano problem. Must it also be confessed that all the old automobile is worth is merely what the old metal will bring or will some mechanical genius solve his trade's problem?—Minneapolis Journal.

A Glory to the Allies

Spirit of Kitchener Survives Among the Valiant Troops Which He Formed

Lord Kitchener was a national glory to our Allies on account of his genius as a soldier and a military organizer. By his high, strong, and upright character, and by the incomparable services which he rendered to his country in many fields, he had become a sort of incarnation of England and her immense prestige. The grave of Kitchener is one of the most illustrious that have been opened since the beginning of the war. The mind is no more, but his spirit survives among the valiant troops which he formed. Animated by this far-seeing, resolute and indomitable spirit, they will win with us the inevitable victory—Paris, Le Gaulois.

Minard's Liniment for sale every where.

Keen After Wool

Thirty-seven cents for medium combing first in Saskatchewan is going some. It is the best record so far on the American continent for range wool. You can hardly call the Saskatchewan product anything else for it has a range foundation behind even though the flocks may not be termed strictly range sheep. And who do you suppose were the buyers? No other than Swift and Co., the Chicago packers. The packers in the wool game—what next! When buyers can pay that figure for wool stuff, the eastern men who sold for 35 will feel kind of small—Sheep Breeder, Chicago.

Raincoats Made of Paper

Inexpensive emergency raincoats which can be folded up and carried in a pocket or handbag are being made to fill the need so sorely felt. One is caught in a storm without any form of waterproof protection. Rain garments are made in suitable for men, women and children, and come in two grades. The cheaper article is made of tough paper, the other of cloth. The latter is designed to be used but once; the other is reinforced with cloth mesh, and will properly serve for many years. Popular Mechanics Magazine.

Maid: The young clergyman who performed the ceremony seemed dreadfully flustered.

Ethel: Mercy, yes. He kissed the bridegroom and shook hands with the bride.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Soothes the fretting child during the trying period of its development and thus gives rest and relief to both child and mother.

The Farmer: Ah! There you are! Where have you been all this time? And where's the mare I told you to get shot?

The Hand: Shod! I thought you said shot! I've just been abjuring of her—Sketch.

ARLINGTON

WATERPROOF COLLARS AND CUFFS

Something better than linen and big handkerchiefs. Wash it with soap and water all over. No State style and size. For 25c we will mail you.

THE ARLINGTON COMPANY OF CANADA, Limited
55 Beaver Avenue, Toronto, Ontario

Nearly every one of his friends had suffered from the caprices of the practical joker. Happily the joker had weak points of his own. One of them was a dislike for night air. One morning about 2 o'clock there came a tremendous thumping at his front door. The joker hopped out of bed, opened his front window, and leaned out. "In heaven's name, what is the matter?" he said. "One of your windows is open," said a man on the sidewalk. "Which one?" said the joker. "The one you've stuck your head through," was the reply.

An Easy Pill to Take.—Some persons have repugnance to pills because of their nauseating taste. Parment's Vegetable Pills are so prepared as to make their use pleasant and the most fastidious. The most delicate can take them without feeling the revulsion that follows the taking of ordinary pills. This is one reason for the popularity of these celebrated pills, but the main reason is their high standard quality as a medicine for the stomach.

Mrs. Winslow's Soothing Syrup

Makes Cheerful, Chubby Children

Soothes the fretting child during the trying period of its development and thus gives rest and relief to both child and mother.

Minard's Liniment Co., Limited.

Dear Sirs:—I had a Bleeding-Tumor on my face for a long time and it was very painful. I was advised to try MINARD'S LINIMENT, and after using several bottles I had a complete cure, and it healed all up and disappeared altogether.

DAVID HENDERSON,
Bellevue Station, King's Co., N. B., Sept. 17, 1904.

Mr. Meane: I have nothing but praise for the new minister. The Deacon: So I noticed when the plate was passed around.

In the Western Provinces it is said that one in four of the owners of land in the prairie outside the municipality in which his land is located, and of these, one in seven lives outside the prairie. One-half of the urban land is held by absentees—that is, by persons living outside the Municipality.

DOG DISEASES

And How to Cure Them

Measuring Hay in Stack

Rule for Measuring Hay Which Has Been Proven Satisfactory

Estimating the number of tons of hay in stack by measuring is often resorted to when it is inconvenient or impractical to weigh it. It is impossible to give a rule for measuring hay which is entirely satisfactory. The following one has often been used, stated by James Schaffer, of the Washington Experiment Station at Pullman, and approximates the correct weight:

"Width plus over, divided by four and squared, then multiplied by the length and divided by 512."

The above rule assumes that the cross section of a stack may be obtained by dividing the width plus over measurement by four and squaring it. Stacks vary so much in shape that this cannot be absolutely true with all stacks. The above rule also assumes that there are 12 cubic feet in a ton. The length of time a stack has been built, the size of a stack or the amount it has settled, also the kind of hay, all influence the weight of a certain volume of hay. The above or other rules should not be relied upon unless it is impossible to weigh hay when it is sold.

Problem:—Assume that a hay stack measures 18 feet wide, 26 feet over (distance from ground on one side up over the stack and to the ground over the side) and 30 feet long.

The solution would be—18 plus 26 equals 44; 44 divided by 4 equals 11; 11 squared equals 121; 121 times 30 equals 3,630 cubic feet; 3,630 divided by 512 equals 7.09 tons.

Willie came to his mother with an expression of anxiety on his face. "Ma," he asked, "if a poor, hungry little boy was to come to the back door and ask for something to eat, would you give him that piece of pie that was left over from dinner?"

"Yes, Willie," said the mother.

Willie's face cleared. "Just wait a minute till I run around to the back door."

The Non-cathartic Nature-cure for Constipation

Helps the System to Cure Itself.

You cannot cure constipation by violent means. Violence is never effective against nature. That is why the use of morning salts and purgative pills so easily become a habit. These things do not cure the trouble; they only force matters, and in so doing weaken the bowels till natural action becomes impossible, and you have to go on taking your pills or salts indefinitely. Compare Dr. Cassell's Instant Relief. This great tonic laxative helps nature by strengthening the bowels, natural action is restored and a cure effected which is real and lasting.

Dr. GHAS. F. FORSHAW, D.Sc., F.R.M.S., a well-known British Scientist, writes:—"Never take Salines or Purgatives for Constipation—to force Bowel action is to suppress the true and create the false. Constipation habit. I recommend as a superior and convenient treatment Dr. Cassell's Instant Relief."

Take Dr. Cassell's Instant Relief for constipation, biliousness, torpid liver, sick headache, dizziness, general debility, flatulence, and windy, spasmodic, acidity, heartburn, impure blood, and other dull, heavy feeling which is a sure sign of many troubles.

Price 50 Cents from all Druggists and Storekeepers.

or direct from the sole agents for Canada, Harold P. Richardson & Co., Ltd., 10, McCull Street, Toronto, W. T. 2, cents extra.

Dr. Cassell's Instant Relief is the companion to Dr. Cassell's Tablets.

Sole Proprietors: Dr. Cassell & Co., Ltd., Manchester, England.

Dr. Cassell's Instant Relief

Why People Feel Depressed in the Cold Weather

Why is tiredness and languor so prevalent just now? A physician explained that the winter drives blood from the surface of the body to the liver. Normally one-fourth of the whole blood supply is in the liver and when more blood is accumulated in that organ everything goes wrong. We have a remedy for this. Dr. Hamilton's Pills, which are composed of such vegetable extracts as Mandrake and Butternut, and possess wonderful liver stimulating powers. It is a marvel the way Hamilton's Pills clear the blood of the poisonous humors. They put new life into worn-out bodies, build up the appetite, bring back a reserve of nerve energy, tide folks over the cold days of winter and the depressing days of spring. For your health and body comfort get a 25c box of Dr. Hamilton's Pills today.

Italy Confident of Victory

A New Europe to Be Created in Which Nationalities Will Be Free

Two years of this sanguinary tragedy have shown on the one hand the crime of those who provoked it, and on the other the fact that all the people are making every sacrifice so as not to lose the liberty to live. We are entering the third year of the war, which without doubt will be the year of victory. With firm confidence in the power and bravery of their armies, Italy, France, Russia and Great Britain struggle valiantly and approach inevitably the day of their triumph. The German press spends its time in denouncing the German body, but the German people is now convinced that it has come to the end of its misadventure and will close this adventure without a very serious loss of prestige and economic strength. As to Austria, the arrogant Imperialism, the German and her feudal army is already broken, her war power very seriously weakened. Italy and France, for Balkan hegemony destroyed, and even her unity is terribly threatened. Thus the plans of the two emperors are broken and the ruins of Prussian militarism and Austria-Hungarian feudalism, and a new Europe is about to be created in which nationalities will be free, peace will be assured, and Italy will have the place to which she has a right by the sublime virtues of her people—Giornale d'Italia, Rome.

DODD'S KIDNEY PILLS

GRAND KIDNEY DISC

Two bankers were talking about a financier who had failed.

"And did you not accept his failure like a man?" asked the first.

"Exactly like a man," the second answered. "He flamed it on his extravagant wife."
